Installation of Rack

Step.1

Before opening the package, check the outer package for damage. Open the package and check the rack for damage of the exterior or missing accessories. The attachments are placed as follows:

Step.2

Fix the 4 TriPods on 2 Cross beams respectively using M6*12 hexagon socket cross combination screws and electric screwdrivers

Step.3

Fix the four cross beams to the lower left and lower right corners of the right side beam assembly using the M6*12 outer hexagonal cross combination screws and electric screwdriver.

Step.4

Fix the left side beam unit to the upper left and upper right corners of the right side beam assembly using the M6*12 outer hexagonal cross combination screws and electric screwdriver.

Step.5

Flip the rack to the back, and the left and right diagonal braces are fixed on both sides of the beam assembly with M6*12 outer hexagonal cross screw combination and electric screwdriver.

Step.6

Screw the foot cup into the base and secure it with a hex wrench or by hand. After screwing, make sure that all four cups are at the same height.

Step.7

Flip the rack to the front, and the logo board is fixed on top of the beam assembly with M6*12 outer hexagonal cross screw combination and electric screwdriver.

Step.8

When installation is complete, stand the rack up. Secure the four rack fasteners to the sides of the rack using eight M6*12 outer hexagonal cross combination screws
